

NEUROSCIENCE SEMINAR SERIES

TUESDAY, DECEMBER 10, 2024
1:00-2:00PM
IN PERSON ROOM 2003 AND ZOOM

PRESENTED BY:

Azad Bonni, MD, PhD

Senior Vice President and Global Head Neuroscience and Rare Diseases Roche Pharma Research & Early Development

Hosted by Dr. Arezu Jahani-Asl

SEMINAR TITLE

"DEREGULATION OF UBIQUITIN SIGNALING IN GENETIC NEURODEVELOPMENTAL DISORDERS"

Learning Objectives

- 1. Gain understanding of fundamental mechanisms of ubiquitin signaling in brain development
- 2. Gain understanding of how ubiquitin signaling is deregulated in genetic neurodevelopmental disorders: Ferguson-Bonni syndrome and Hao-Fountain syndrome
- 3. Update on an open label Phase 1 trial of Rugonersen in children with Angelman syndrome
